• Provide interface between IR PowIRCenter GUI and the IR controllers
USB005 Interfaces and Spec

- No external power supply. Powered by USB 5V connector pin
- i2c speed up to 400 KHz. Speed can be set by IR PowlIRCenter GUI.
- Require Silicon Labs USBXpress driver which is included in the IR PowlIRCenter GUI installation package.
- USB005 has clear blue casing
Successful USB005 Connection to the GUI

Green color indicates good USB connection between PC and USB005 board
